October 2009

Dear Customer,

This month we would like to introduce our range of roller cam followers.

As you know, cam followers are rolling mechanisms whose particularly thick external ring rolls on a track. The end of the spindle is threaded to enable easy assembly. There are also ready to assemble and pre-greased assemblies designed for all types of cam mechanisms, conveyors, etc. which therefore adapt to varied operating conditions. They withstand high loads and impacts.

We produce roller cam followers in sizes from 1/2" to 10" and can also produce metric dimensions if the volumes are sufficient.

Our cam followers are available with or without spindles and offer you the best seals in the Business.

You can directly consult our website to check the availability of a product, its price even order one at www.rbcfrance.com in the e-shop section .
